PROFESSIONAL SUMMARY

Results-driven Systems Engineer with 10+ years of experience supporting mission-critical infrastructure, SCADA systems, industrial controls, electrical systems, automation platforms, and IT operations across airport, transportation, industrial, and facility environments.

Experienced in project execution, system monitoring, incident response, troubleshooting, commissioning, preventive maintenance, reliability engineering, field support, and infrastructure modernization.

Demonstrated success supporting uptime-critical operations, electrical power distribution systems, control networks, SCADA platforms, field devices, and large-scale infrastructure projects.

Currently pursuing advanced studies in Computer Science and Artificial Intelligence with a focus on automation, intelligent systems, software engineering, and data-driven operational improvement.

KEY QUALIFICATIONS

- 10+ Years Engineering Experience
- Airport Transportation Systems
- SCADA & Industrial Controls
- IT Infrastructure & Field Support
- Electrical Power Systems
- Reliability Engineering
- Incident Response & Troubleshooting
- Project Engineering & Commissioning
- Automation & System Monitoring

CORE COMPETENCIES

Systems Engineering • SCADA • Industrial Controls

IT Infrastructure • Technical Support

Automation • Python • Java • SQL

Electrical Engineering • Commissioning

Reliability Engineering • Troubleshooting

System Monitoring • Incident Response

Root Cause Analysis • Project Engineering

Airport Systems • Transportation Infrastructure

PROFESSIONAL EXPERIENCE

Operations, Maintenance & Electrical Project Engineer

Atlanta Airport SkyTrain (APM System), Atlanta, GA

Jan 2021 – Present

- Support mission-critical airport transportation infrastructure and automated people mover systems.
- Support SCADA systems, control networks, monitoring platforms, and uptime-critical operations.
- Perform troubleshooting, fault diagnosis, and incident response to restore service and reduce downtime.
- Coordinate installation, testing, commissioning, and startup of electrical and control systems.
- Support reliability improvement initiatives, preventive maintenance planning, and availability reporting.
- Execute infrastructure upgrades and capital improvement projects.
- Coordinate contractors, vendors, and internal stakeholders in active operational environments.
- Maintain technical documentation, compliance records, schedules, and maintenance reports.
- Support system monitoring, operational performance analysis, and engineering investigations.

Electrical Engineer (Site & Field Operations)

JUPITER EMC LLC, Abu Dhabi, UAE

Jan 2017 – Dec 2019

- Supported installation, maintenance, and operation of electrical and lighting infrastructure.
- Coordinated field activities, contractors, and site engineering teams.
- Interpreted engineering drawings, specifications, and project documentation.
- Prepared technical reports, work method statements, and risk assessments.
- Supported inspections, approvals, commissioning activities, and project handover.

Electrical Engineer (Fire & Life Safety Systems)

TGCSS LLC, Abu Dhabi, UAE

Jan 2015 – Jan 2017

- Installed, tested, and maintained fire alarm and firefighting systems.
- Performed electrical testing, continuity testing, and insulation testing.
- Executed troubleshooting and corrective maintenance activities.
- Supported compliance with safety regulations and operational standards.

Electrical Engineer (Facilities & Infrastructure)

EMRILL Services LLC, Abu Dhabi, UAE

Jan 2012 – Jan 2015

- Installed and maintained LV distribution systems, SMDBs, and DBs.

- Supported facility infrastructure, fire systems, pumps, and emergency power systems.
- Performed preventive maintenance, testing, commissioning, and field troubleshooting.
- Supported safe and reliable facility operations.

SELECTED PROJECT EXPERIENCE

SCADA & Operations Support

- Supported SCADA monitoring and operations for airport transportation systems.
- Performed troubleshooting, incident response, and reliability analysis.

IT & Infrastructure Support

- Supported field IT systems, networked devices, and system integration activities.
- Maintained uptime-critical infrastructure and operational systems.

Automation & Software Projects

- Developed automation and academic software projects using Python and Java.
- Built database and systems projects while completing graduate studies in Computer Science.

EDUCATION

Master of Science (MS), Computer Science
Merrimack College. (2025-2026)

Bachelor of Science (BS), Electrical Engineering (2008 – 2012)
Hajvery University
